Section 1: **Background**

MBA Practice Profile Research

Since 2005, the Management & Business Academy (MBA), sponsored by Essilor, has gathered comprehensive information on the characteristics and financial performance of over 1,600 private optometric practices in the U.S. The MBA metrics database is believed to be the largest of its kind ever assembled. It includes practices across the entire spectrum of sizes and characteristics and both new and established practices.

This report has been prepared exclusively for your practice. It is strictly confidential and is not available to the program sponsors. Nor is any performance data for individual practices available to the sponsors.

Each year MBA publishes a comprehensive report: “Key Metrics: Assessing Optometric Practice Performance,” which presents more than sixty performance benchmarks relevant to private practice optometrists. The report includes guidance on how to interpret the performance benchmarks and how to use them to set realistic improvement goals. “Key Metrics” is a valuable introduction to your customized Practice Profile Report.

Using This Report

In this report, the first section shows your practice’s performance for a number of key productivity metrics and the percentile ranking of your practice among a large national sample of practices which have participated in the MBA Practice Profile research program.

For performance ratios that you did not directly report, but are calculated based on data you did supply (eg. gross revenue per complete exam), the data you supplied are shown, as well as the calculated performance ratio. For some productivity measures, estimates are provided of the financial impact on your practice revenue of achieving the 75th percentile of performance – a goal within reach of any practice making a dedicated effort to improve performance.

The metrics are divided into seven groups, including:

- Total Practice Productivity
- Eyewear
- Contact Lenses
- Medical Eye Care
- Marketing
- Financial
- Management “Best Practices”

At the end of each metrics grouping, a summary of your performance percentile rankings is shown, providing an at-a-glance assessment of your performance in each management area.

As you examine the report, you may note that certain performance metrics are “not reported,” indicating you did not supply the data necessary to calculate a performance ratio. For these metrics, the report can still be useful in assessing performance. You are able to calculate your performance by supplying the missing data, then comparing your performance to the deciles shown.

For metrics for which the median values are changing annually among optometric practices (fees, product usage ratios, etc.), the percentile rankings are based only on the prior year’s sample of respondents. For other performance ratios, the median values of which have been stable during recent years (eg. most revenue and exam production metrics), the percentile rankings are based on all previous MBA Practice Profile respondents.

Many productivity ratios are the product of a number of interacting variables. For example, gross revenue per complete exam is influenced by fees, retail pricing, product mix, capture rate, multiple device sales and managed care revenue ratio. On report pages discussing productivity metrics, there is a box titled “Performance variables impacting productivity.” This box lists the most important variables impacting that performance metric, ranked by the magnitude of their influence on performance in typical practices. These lists of variables provide guidance on what other practice metrics you should examine to identify the underlying causes of your performance, which will be useful in developing a targeted process improvement strategy. The report offers many comparative metrics to facilitate identification of causes of low performance.

As you examine your performance rankings in the first section, make a list of those metrics for which your performance is below the 40th percentile, focusing particularly on any for which you rank in the 25th percentile or lower. For these metrics you have a large opportunity for improvement. From the deficiency list, select two or three metrics on which to analyze your current performance in more detail in order to identify action steps for improvement.

For some metrics, a low productivity ratio does not necessarily indicate sub-optimal performance, but may reflect a conscious strategy to minimize effort in a particular area. For example, low ratios for medical eye care patient visits might reflect a deliberate de-emphasis on this service.

As you compare your expense ratios to optometric norms, remember that these ratios are affected by your revenue mix, your staffing philosophy, the age and size of your practice and any extraordinary spending event that may occur during a particular year. If you discover that your spending ratio in any category is well above the median, a useful next step is to conduct an in-depth analysis of all the expenses in that category to identify the specific sources of the high ratio.

At the end of the first section of the report, the management “Best Practices” currently in use in your practice are shown, and a composite score is presented,

enabling you to compare your level of adoption of “Best Practices” to a national cross section of your peers.

Section three compares your response to each question in the Practice Profile survey to the median response (or distribution of responses) of all other practices that completed the questionnaire in the past two years. Section two provides considerably more detail about the operational processes and characteristics of U.S. optometric practices including revenue sources, growth rates, instrumentation, staffing, expenses, OD compensation and many other quantitative measures. Compare the operational details of your practice to this national profile to further assess your strengths and weaknesses.

Section 2:

Practice Percentile Rankings

Total Practice Productivity Metrics

- **Gross Revenue per Complete Exam**
- **Complete Exams per OD Hour**
- **Annual Gross Revenue per Active Patient**
- **Annual Complete Exams per 100 Active Patients**
- **Gross Revenue per OD Hour**
- **Annual Gross Revenue per FTE OD**
- **Gross Revenue per Non-OD Staff Hour**
- **Gross Revenue per Square Foot of Office Space**

Gross Revenue per Complete Exam

Your 2016 gross collected revenue:

Your 2016 complete eye exams:

Your gross revenue per exam is:

Your productivity percentile ranking is:

IMPROVEMENT OPPORTUNITY				MEDIAN		HIGH PERFORMANCE				
\$159	\$221	\$251	\$276	\$297	\$306	\$317	\$341	\$371	\$416	\$500
5 th	15 th	25 th	35 th	45 th	50 th	55 th	65 th	75 th	85 th	95 th
PERCENTILE RANKING										

Your revenue opportunity at 75th productivity percentile:

Your complete eye exams (2016 actual):

Gross revenue per exam (75th percentile): **\$371**

Annual gross revenue (at 75th percentile productivity):

Gross revenue increase (versus 2016 actual):

Performance variables impacting productivity (ranked from greatest to least impact)

- Gross revenue per eyewear sale (eyewear product mix)
- Eyewear capture rate
- Managed care patient ratio
- Contact lens sales per contact lens exam (capture rate, boxes per wearer, usage ratios of specialty lenses, usage of daily disposable lenses)
- Professional fees
- Eyewear retail pricing
- Contact lens retail pricing
- Multiple device sales

Complete Exams per OD Hour

Your 2016 total OD hours:

Your 2016 complete eye exams:

Your complete exams per OD hour is: 0

Your productivity percentile ranking is:

IMPROVEMENT OPPORTUNITY				MEDIAN				HIGH PERFORMANCE			
0.50	0.71	0.84	0.96	1.06	1.10	1.15	1.28	1.44	1.65	2.18

Questionnaire Responses

About Your Facilities

	Total Practices (median)	Your Practice
How many office locations do you have?	1	
What is the total square footage of all locations of the practice?	3,000	
What is the total square footage of the optical dispensary(s) of all locations of the practice?	680	

About Your Manpower

How many full-time or part-time staff members (non-OD) are currently employed by your practice?	6	
Twelve months ago , how many full-time or part-time staff members (non-OD) were employed by your practice?	6	
What number of full-time or part-time non-OD staff members Stopped working for the practice , for any reason, during 2016?	1	
What is the total number of hours that all non-OD staff members worked in the practice during 2016?	9,065	
During the average work week, approximately how many hours does your staff spend engaged in activities related to patient recall?	2	
How many optometrists currently work in the practice, either full time or part-time?	2.1	
How many of the optometrists who work in the practice are employed associate ODs ?	0	
What is the total number of hours that all ODs worked in the practice during 2016?	2,625	

About Your Patient Base

Approximately how many total active patients do you have in the practice?	7,500	
--	-------	--

	Total Practices (average)	Your Practice
Of your total active patients, approximately what percentage falls into each of the following three groups?		
Wears eyeglasses only	55%	100%
Wears contact lenses-even occasionally	34%	
Wears neither eyeglasses or contacts	11%	

About Your Patient Visits

	Total Practices (median)	Your Practice
What was the total number of complete eye exams performed by the practice during 2016?	2,649	
Of the total number of complete eye exams performed during 2016, how many were.....?		
Provided to patients who use spectacles as their primary corrective device	1,449	0
Contact lens exams	707	0
"Healthy eye" exams provided patients requiring no correction	300	0
Of the total number of complete eye exams performed during 2016, what percentage was performed for patients new to the practice?	25%	
During 2016, approximately how many new patients were initially attracted to the practice by your website?	25	
Of the total number of complete eye exams performed during 2016, what percentage were provided at a discounted fee as part of a managed vision care insurance plan (exclude Medicare/Medicaid)?	65%	0%
During 2016, what was the total number of follow-up supervision visits by contact lens patients?	400	

	Total Practices (median)	Your Practice
During 2016, what was the total number of office visits made by patients to manage each of the following medical conditions ?		
Dry eye	125	
Ocular allergy	90	
Cataract co-management	25	
Glaucoma	72	
Ocular infection	100	
Refractive surgery co-management	10	
Foreign body removal	20	
Total medical eye care visits	517	
For each of the conditions listed below, approximately how many pharmaceutical prescriptions have all optometrists working in the practice written during the past 90 days?		
Dry eye	18	
Ocular allergy	30	
Glaucoma	12	
Ocular infection/inflammation	26	
Total pharmaceutical Rxes	115	
During 2016, what was the total number of patients for whom retinal imaging was performed?	500	

About Your Practice Revenue

What was the total collected gross revenue of the practice during 2015 ?	\$863,000
What was the total collected gross revenue of the practice during 2016 ?	\$865,000
For the average month during 2016, what was the total accounts receivable of the practice?	\$40,000

	Total Practices (median)	Your Practice
Of the total gross revenue collected by the practice during 2016, what amount came from each of the following sources?		
Complete refractive eye exams	\$230,000	
Contact lens follow-up supervision visits	\$23,000	
Medical eye care visits	\$46,000	
Other professional fees	\$18,000	
2016 Total professional fees	\$369,000	\$0
Eyeglasses sales	\$385,000	
Contact lens sales	\$111,000	
Other product sales	\$1,300	
2016 Total product sales	\$488,000	\$0
Of the total gross revenue collected by the practice during 2016, what amount came from each of the following payers?		
Medicare/Medicaid	\$86,500	
Vision/health insurance companies	\$441,000
